

## **IgeaCare Systems Inc. appoints Telemedicine Industry Veteran, Dr. Pramod Gaur, as President of its Healthanywhere™ Division.**

TORONTO, Jan. 9 /CNW/ - IgeaCare Systems Inc. "IgeaCare" is pleased to announce they have appointed Dr. Pramod Gaur as President, Healthanywhere, a Division of IgeaCare Systems Inc.

"Dr. Gaur is a seasoned veteran in the telehealth industry and has had a hand in shaping the direction of the industry from its very early stages" said Peter Tassiopoulos, CEO IgeaCare Systems Inc. stating further "the experience and knowledge that Dr. Gaur brings to IgeaCare will be a great benefit to our organization and even more so to our customers."

Dr. Gaur's activities as a telehealth industry advocate include demonstrations to the US Presidential Advisor, US Congress, The White House Conference on Aging and to International Delegates at the United Nations.

Dr. Gaur has contributed to the American Telemedicine Association (ATA) as Chairman of the ATA Industry Council's Advocacy Alliance in 2004. He has been an active contributor on ATA Policy Committee since 2004. In May 2006, Dr. Gaur was elected Chairman of the ATA Industry Council and served a one year term on the ATA Board of Directors.

Prior to joining IgeaCare, Dr. Gaur served as the founding President and CEO of Viterion TeleHealthcare LLC, A Bayer - Panasonic Company. He was responsible for establishing the company's telehealth business from its inception in 2003 to rapidly becoming an industry leader in the United States and abroad. Prior to starting Viterion, Dr. Gaur spent eight years at Bayer HealthCare, Diagnostics Division, holding a number of senior management level positions in Global Strategic Planning, Sales and Marketing and R&D. Prior to joining Bayer, Dr. Gaur held management positions at Baxter International, Hybritech Incorporated (Eli Lilly & Co.) and Stauffer Chemical Co.

"I am delighted to join the IgeaCare team to provide our state-of-the-art Healthanywhere solution for disease management" said Pramod Gaur. He continued "As the Baby Boomer generation is approaching retirement age; a true continuum of care solution is needed to maintain the desired quality of life"

IgeaCare offers, through its Healthanywhere Division, uniquely differentiated intelligent solutions for disease and wellness management that enable dramatic improvements in home healthcare delivery, reduce overall costs, increase resource utilization and enable significant improvement in patient outcomes across a wide range of illnesses, while seeking to delay the

onset of disease in those with chronic conditions. Our software technology products enable healthcare providers to optimize the cost of home nursing with the right mix of technology and hands on care. Our product solutions provide automated electronic record of care and track patient outcomes, making it possible for insurers/payers to implement Pay-for-Performance payment systems and integration of patient data into an Electronic Health Record.

### **About IgeaCare Systems Inc.**

IgeaCare develops and manufactures state-of-the-art telephony based communication systems, with a focus on the healthcare sector. Our technology coupled with our strategic partnerships, enables us to increase productivity and quality of care by providing complete communication solution, connecting patients, staff, attendants, maintenance and administration with each other in real time.
